

# CONSULTING

Serving as your eyes and ears on the ground, and providing ideas customized to the market, your real estate portfolio and your goals: That's a meaningful consulting relationship defined.

To guide smart real estate decisions in active energy markets, harnessing the power of timely market research, experience and intimate knowledge of the marketplace is critical.

**ENERGY REAL ESTATE SOLUTIONS (ERES)** provides an insider's perspective within established and emerging shale plays. This level of insight, coupled with a diligent focus on key industry and marketplace issues enables our clients to stay ahead of the curve, capitalize on key real estate trends and positively impact their bottom line.

## Our services include:

- Strategic real estate portfolio consulting
- Workforce housing strategy
- Market analysis
- Activity forecasting
- Valuation
- Feasibility analysis
- Construction management
- Sale leaseback strategies
- Lease administration

ERES' unique business model enables us to provide well-rounded consulting and a breadth of services to help you achieve commercial success in rural energy markets. We are one of the only firms in North America that provides a "one-stop-shop" for all real estate services including brokerage, construction management, property management, development and workforce housing.

Our value lies in our industry and geographic knowledge, our expertise in the energy industry, our integrity, and the breadth of our skills. Particularly in rural markets, we consistently exceed our clients' expectations by providing services and sophistication in rural energy markets that are typically characteristic of major cities.

We look forward to serving as your eyes and ears in today's complex energy real estate environment and helping you harness your next big real estate opportunity.
